

Water Quality Conditions in the Neponset River Watershed

Parameter: Fecal Coliform Bacteria

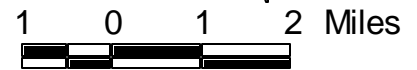

Samples collected May 22, 2002

Charles River Watershed

Weymouth/Weir
Rivers Watershed

Taunton River Watershed

LEGEND

- Sampling Locations
- Swimmable
 - Fishable
 - Violates
 - No Data
 - Major Roads
 - Streams
 - Ponds and Impoundments
 - Neponset River Watershed
 - Neighboring Watersheds
 - Boston Harbor

Water quality conditions at sampling locations are classified according to the Massachusetts Surface Water Quality Standards for Class B waters using the parameter, fecal coliform bacteria (cfu/100 ml) (314 CMR 4.00).
