

Purposes from Existing Articles of Organization

The association's primary function is to make studies and engage in educational and publicity activities to preserve and utilize natural resources, protect wildlife, reduce and prevent stream pollution and conserve water resources, all in the Neponset River watershed. In furtherance of this purpose, it may publish written materials, conduct conferences, advise as to beneficial legislation and cooperate with private individuals and organizations, municipal, state and federal bodies to further the best conservation use and management of land and water located in said watershed.
